Project Code: STLU0016  
Project Name: August 2026 SLU/YouGov Poll  
Prepared for: Steven Rogers  
Interviews: 900  
Field Period: August 13, 2026 – August 24, 2026  
Project Manager: Nour Abboud Frank

=====

YouGov interviewed 1276 Missourian registered voters with the goal of screening for and surveying 900 likely voters in the 2026 midterm elections. The 1276 registered voters were matched down to a sample of 1074, yielding a target subsample of 900 likely voters. The respondents were matched to a sampling frame on gender, age, race, and education. The sampling frame was constructed by stratified sampling from the Missouri subset of the 2024 Current Population Survey (CPS) 1-year sample with selection within strata by weighted sampling with replacements (using the person weights on the public use file).

The matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity, years of education, and home ownership. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles.

The weights were then post-stratified on 2024 presidential vote choice as well as a four-way stratification of gender, age (4-categories), race (4-categories), and education (4-categories). The weighted dataset of 1074 registered voters was then subsetting to the 900 likely voters, and the weights were trimmed and recentered around 1, to produce the final weights.

Sample size: 900 with a credible interval of +/- 4.1 percentage points. This survey has an estimated design effect of 1.25 yielding an effective sample size of 720.
